PROJECTS

Brainy Phonics Web Application   *Sept 2019 - June 2020*
- Literacy web application designed to teach children aged 3-8 letter sounds and word recognition
- Published by Augusta University as part of their English Program Schools Project and developed using HTML, CSS, and Angular framework

DoMi Music Education Game   *Sept 2018 - Dec 2018*
- Gamified lesson and assessment tool built to teach children aged 3-5 beginning music and phonemic concepts
- Developed using HTML and Phaser 2D game framework

CFM Data Visualization Tool   *Sept 2018 - Dec 2018*
- Data visualization web application created for the use of Community Farmers Markets (CFM) to help harness their data and see underlying patterns
- Developed using HTML, CSS, JavaScript and Chart.js

WORK EXPERIENCE

Itential   **Atlanta, GA**
Software Engineer   *June 2020 - Present*
- Manage the JSON Schema Transformation (JST) Designer application for creating data transformations within Itential's automation builder
- Collaborated with the design team on the complete redesign of the JST Designer application
- Built out and executed a roadmap strategy to integrate data transformations into Itential's network automation platform

TryMyUI   **San Mateo, CA**
Usability Tester   *July 2018 - Dec 2019*
- Analyzed websites and applications to ensure prototypes are intuitive and marketable to consumers
- Provided feedback on ease-of-navigation, overall functionality, and UI layouts and design

Itential   **Atlanta, GA**
Software Engineer Co-op   *Aug 2016 - May 2018*
- Implemented new features and fixed software bugs in customer-facing applications within Itential's network automation platform
- Created mockups and wireframes using Sketch for potential new features
- Developed core UI components to be reused across our platform and establish a consistent user experience
- Authored, reviewed, and managed technical product documentation
- Utilized knowledge in JavaScript, Pug.js, MongoDB, Node.js, AngularJS, SCSS, jQuery and React
